

## **UTI Program**

## **Appendix F: Implementation Steps and Core Strategies**

This is an excerpt from the Urinary Tract Infection (UTI) Program: <u>Implementation Guide</u> (Appendix F). This resource identifies the UTI Program implementation steps and core strategies. It can be used by your implementation team as you work through the planning phase of the UTI Program, to ensure that you address each step. This can also be used as a quick reference sheet for the UTI Program steps and strategies.

UTI Program implementation strategies
Increase buy-in and support
Strategy A: Involve local influencers
Strategy B: Generate buy-in
Strategy C: Align policy and procedures to reflect practice changes
Strategy D: Review how resident symptoms are documented and communicated
Increase knowledge and develop skills
Strategy E: Deliver education to staff
Strategy F: Provide information and education to residents and families
Strategy G: Use coaching to reinforce practices and support staff
Monitor practice and give feedback to staff
Strategy H: Keep track of how your home is doing and provide feedback to staff
Strategy I: Continue to remind staff of key practice changes
